

LUMETRON WP-Series Precision Gauges

The **LUMETRON WP-Series Gauges** are precision gauges to test the dimensional tolerances and requirements of many different types of products. The gauges are designed to verify the quality & safety characteristics of products, as required by national & international safety regulatory agencies such as BIS, UL, CSA, VDE, BSI, DIN, IEC, etc. These are precision engineered test gauges for use by Safety & Compliance Testing Laboratories.

Lumetronics can supply many different types of gauges. Some of the gauges in our present range include the the following described below. For other gauges not indicated here, please contact us for feasibility and other details.

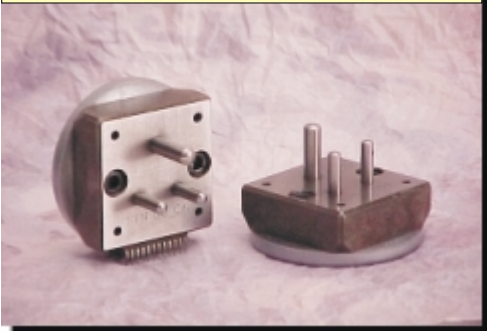

Max. / Min. GO Gauges for 16A Sockets
