LUMETRON Test Equipment - New Products

At Lumetronics, we are constantly developing new test & measuring equipment to fulfil the requirements of our clients for their safety, compliance, regulatory or other testing needs. The instruments we design, develop and manufacture are used to verify the quality & safety characteristics of products, as required by national & international safety regulatory agencies such as BIS, UL, CSA, VDE, BSI, DIN, IEC, etc. We can supply many different types of custom built test equipment. Some of the new products in our present range include the following described below. Please contact us for additional details about these or other test equipment.
